

Upgrading your WL559E's Firmware

STEP 1: Downloading the Firmware from Aztech Website

- Using your PC, open a web browser and go to www.aztech.com.
- Click on Categories>Aztech Datacom.
- From the Aztech Datacom Page, Click on Wireless Repeater.
- Select WL559E from the Wireless Repeater Page.
- In the WL559E page, scroll down the page, click on Downloads>Firmware

- Click on the latest firmware available.
- The firmware file will be saved as a zip file. Remember to unzip the file to access the firmware file.

NOTE: It is important to only use official released Aztech Firmware

STEP 2: Initial Setup

To upgrade your firmware, ensure to connect a PC to your WL559E via Ethernet Cable.

STEP 3: Accessing WL559E Web User Interface

Launch any web browser (Safari, Chrome, Internet Explorer, Microsoft Edge or Mozilla Firefox) and key in **10.0.10.254** in the address bar to access the WL559E web user interface.

STEP 4: Accessing Firmware Upgrade Page

On the Web User Interface, click on **System>Firmware Upgrade**. You will be redirected to the **Firmware Upgrade**.

STEP 5: Uploading Firmware File

Click the **Choose File** button and locate the firmware upgrade file you have downloaded from the Aztech Support Site. You may then click the **Apply** button to confirm and start the firmware upgrade process.

NOTE: It will take approximately 3 mins for the upgrade to complete. It will then follow by a reboot.

STEP 6: Firmware Upgrade Complete

Once the firmware upgrade is complete, you will be redirected to the Web User Interface's Homepage.

It is highly recommended to perform a factory reset to ensure that all new updates are successfully applied.

To do this, simply press the Reset button of your WL559E for 5 seconds.

STEP 7: Confirming if firmware upgrade is successful

To confirm if the firmware upgrade process is successful, click on **System** > **Device Info**. Check the **Firmware Version**. The **Firmware Version** number should match the **latest** Firmware Version number available online.

Firmware Version:	262.2.1-021
--------------------------	--------------------

NOTE: The firmware version number shown above is not necessarily the latest firmware version number. It is just for example.
